DIOCESAN FINANCE, WITH THE COMMUNITY IN VIEW

Good stewardship.
A clearer way.

Behind every balance is a parish, a project, a purpose. Bring deposits, loans and daily financial work into one thoughtfully connected workspace.

Actual application screen. Fictional demonstration organizations and balances.

Built for the work of dioceses and archdioceses

Parish deposits / Diocesan loans / Pooled funds / Requests and review

ONE WORKSPACE. SHARED UNDERSTANDING.

The details, considered together.

Deposits & certificates

Effective-dated and tiered rates, configurable day-count rules, compounding and separate credit cycles.

Loan servicing

Daily interest, payment allocation, opening-term repayment projections and dated payoff review.

Parish relationships

Participating entity directory, distinct accounts, purpose labels and entity-scoped parish access.

Requests & pooled funds

Request decisions and settlement records; proportional pool allocations with independent valuation review.

Month-end & reporting

Interest previews, pending-item checks, period controls, statements and filtered reporting exports.

Records & accounting

Account documents, staff-run recurring entries, opening imports and configurable journal CSV mapping.

A considered transition

1. Understand your workflows. 2. Validate the fit in a pilot. 3. Agree on a controlled rollout.

Explore a hosted pilot or a customer-server configuration with a local database. The customer-server option currently requires external identity services and environment validation.

Available for demonstrations and pilot evaluation. Production use requires security review, validated calculations, tested recovery and deployment acceptance. Historical migration and accounting integrations are scoped separately. Parishwell does not initiate bank payments. No complete DLS parity or security certification is claimed.
